Who We Are

BIG TECH, little egos

The Team

Serious
Brainpower
The Best of the
Industry

The Work

Enterprise
Roll-Outs
Multi-Nationals to
SMB

The Future

Innovative
Development
We produce tools and
connectivity

Our ideas have always been 'big,' at the forefront of business operations, systems, and process improvement. We've implemented over 300 process-intensive systems for our clients, helping them simplify and streamline their business processes and strengthen their bottom line!

We're Trusted in the Industry

Our Partners & Clients

dreamfactory

We've partnered with one of the biggest, baddest -in a good way- open source platforms on the market. We partner with them to design, develop, and introduce our SaaS extensions. They also prefer that we manage enterprise-level implementations for them!

CITRIX®

We are a Citrix Preferred Partner

INGRAM MICRO®

Agency Ingram Micro is one of our largest clients. We've completed an end-to-end system for them, saving them precious time and resources

CIRQUE

The entire Cirque du Soleil marketing department runs on the system we've created for them

PODIO

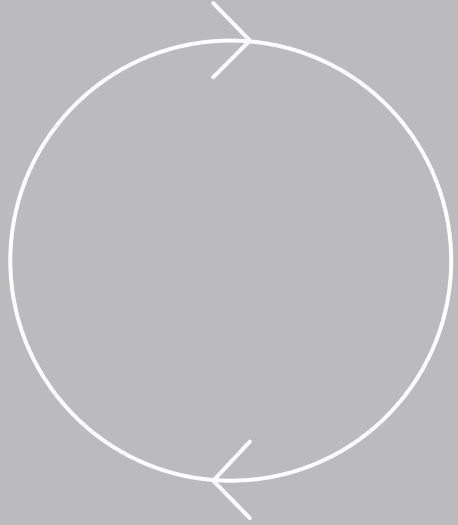

We are the largest Podio Integrators

D&B

Want Industry data? We've partnered with DnB to make that possible

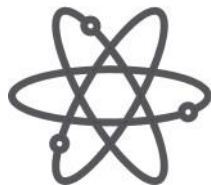

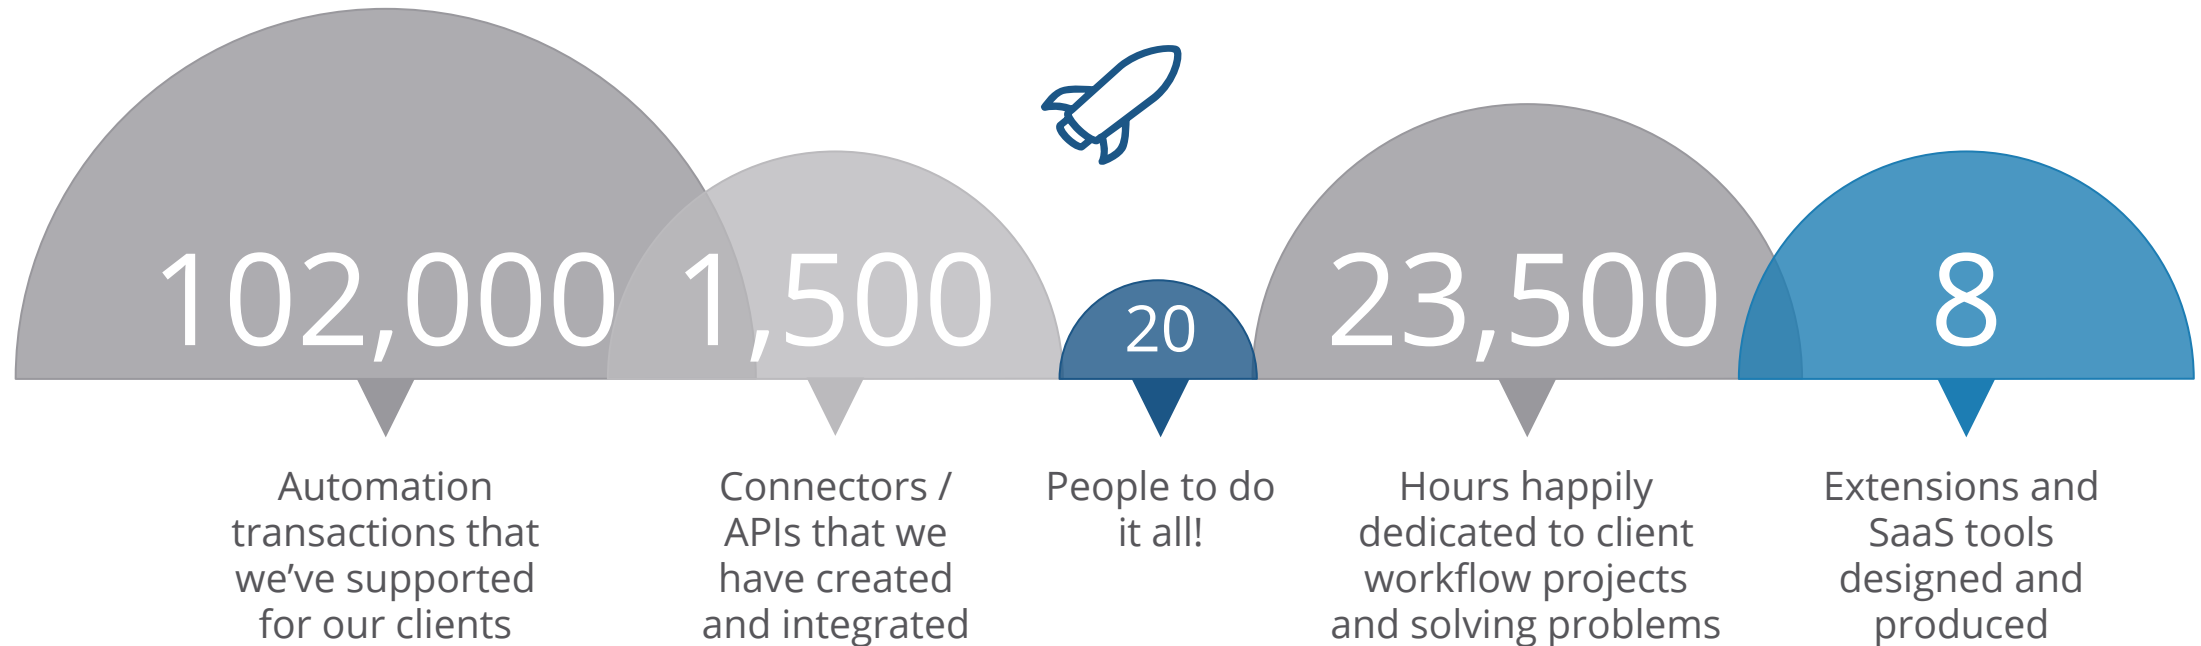

Seattle City Light has used our architecture and automations services to maximize their time

Our Work

Some of our Accomplishments

What We Do

Services
&
Products

Workflow Consultants

Design lean processes & organize your business

Organize

We will engage with you to partner in designing your business organization

IoT System Architecture

Integrate processes into existing/new systems and tools

Streamline

Centralizing improved business processes will create synergy in your business

Automations & Connectivity

Connect all desperate data and tools to increase productivity

Automate

Connecting the best tools with the best systems is no easy task

Extension Development

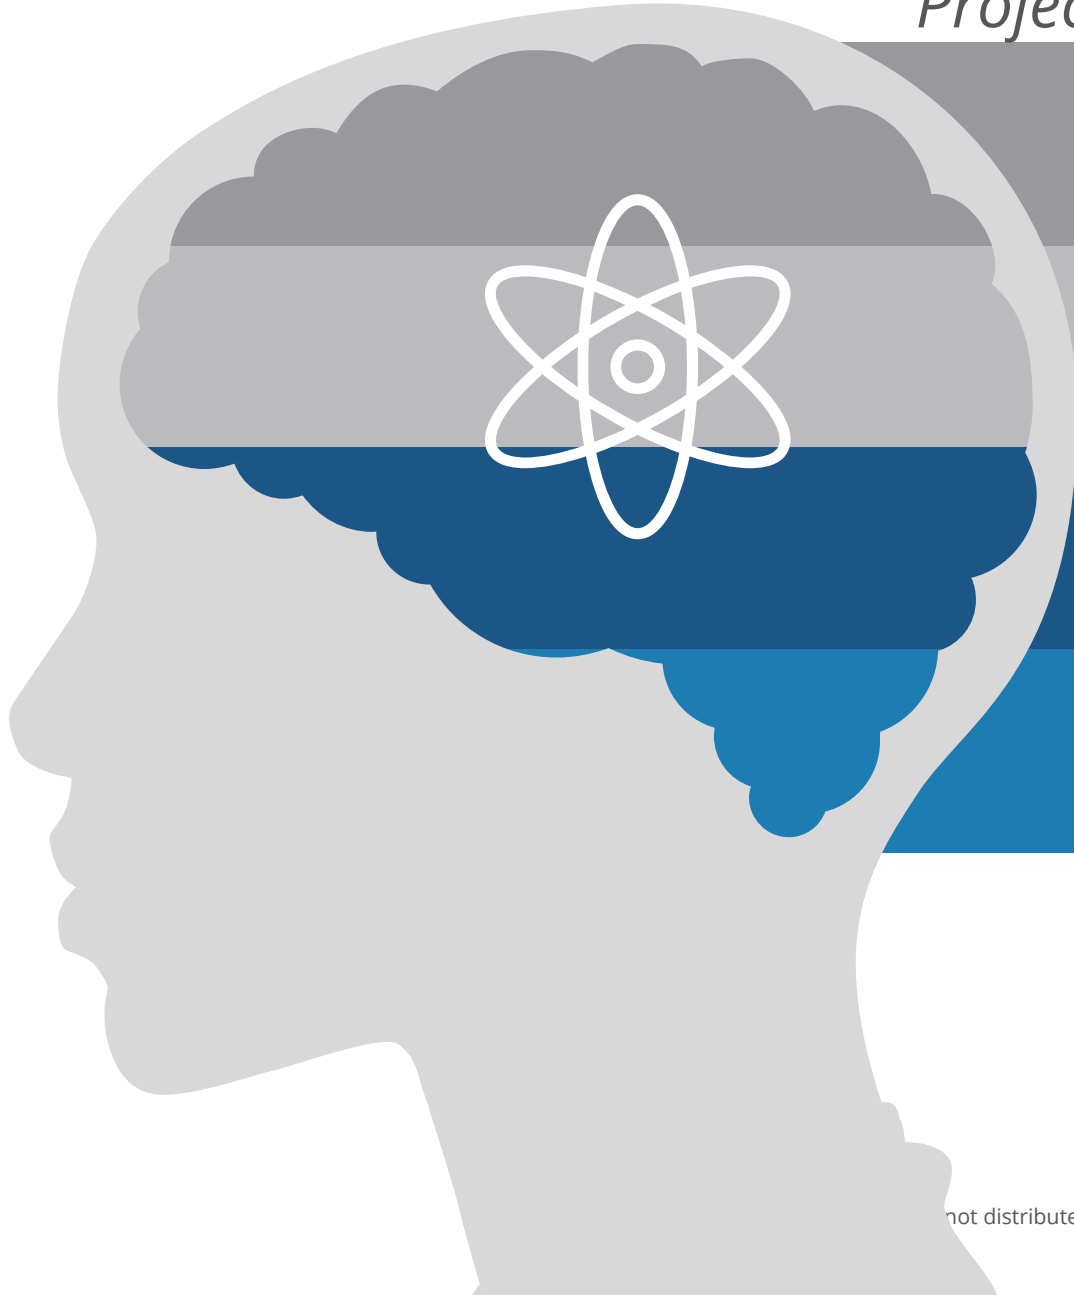

Produce tools that, once integrated, let you relax

Relax

We have fabulous developers creating tools that will make life easier for you

Our Process

Project Lifecycle

01 Engage
Discovery Session and Scope Definition

02 Architect & Build
Design Solution and Integration Requirements

03 Test & Automations
Connect Data & Systems

04 Roll-Out
System hand-off

not distribute or duplicate without TEChEgO's express written
